

Our **vision** for every child, life in all its fullness
Our **prayer** for every heart, the will to make it so

Dear friends,

Driven by our Christian faith, we strongly believe in and relentlessly work towards a life in all its fullness for every child. Such a life needs more than a shelter and a full stomach, it needs to be filled with care, love, hope, and life-enriching values. World Vision Việt Nam staff are working closely with communities to achieve this goal. We invite you to walk with us on this journey, to taste the greatest joy of witnessing lives being transformed: children and their families feeling hope and experiencing positive changes.

Doseba T. Sinay
National Director

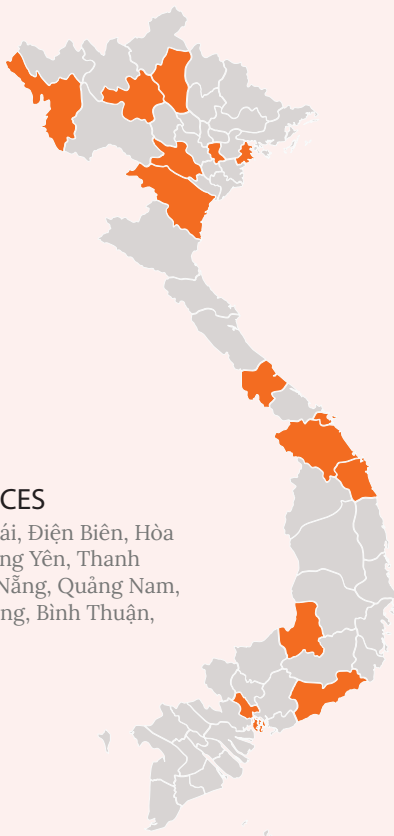

World Vision is a Christian relief, development and advocacy organization, working to improve the quality of life of people, especially children, who are marginalized and living in poverty. World Vision helps all who are in need regardless of their religion, race, ethnicity, gender, or disability.

1 Child Protection

Our unwavering commitment is to **protect children from all forms of abuse, exploitation and injury** which affect millions of children in Việt Nam. World Vision Việt Nam works with communities and the children themselves to have children's rights fully recognized and practiced. Schools and local governments join with us to create opportunities for children to express their thoughts and participate in making decisions on matters that directly concern them.

We also help children to be aware of the possible risks to their safety and learn how to protect themselves and their peers.

Our program contributes to achieving the following Sustainable Development Goals:

2

Nutrition & Health

To reduce malnutrition in children under five, World Vision Việt Nam's interventions are dedicated to **improving dietary intake for expectant mothers and children, as well as improving hygiene and access to safe water to protect families from preventable diseases**. We also seek to promote the importance of prenatal care, exclusive breastfeeding, a nutritious diet and healthy lifestyle.

Through integration with the livelihood component of our program, we support families in poverty to grow vegetables and raise poultry so they can provide their children with a balanced and nutritious diet.

Our program contributes to achieving the following Sustainable Development Goals:

3 Sustainable Livelihoods

To sustain child well-being, World Vision Việt Nam seeks to **boost long-term household incomes** by promoting organic farming techniques and improving farmers' access to resources, markets, and fair trade. This places them in a better position to feed and care for their children.

As young children are healthier and better nourished, they are able to attend school and expand their horizons for a bright future.

Our program contributes to achieving the following Sustainable Development Goals:

Disaster Risk Reduction & Emergency Response

To minimize the risks and damage of disasters, we help communities **develop community-based disaster preparedness plans and build functional rapid response teams** so they are ready to cope with disasters and shocks.

When a disaster strikes, World Vision Việt Nam instantly activates its emergency response. With established partnerships with local authorities and a vast network of field staff and local partners, we make sure that life-saving aid reaches the affected families and relieves their immediate needs. This relief effort is soon followed by a recovery program in which those with disrupted livelihoods are assisted to overcome their losses and rebuild their lives.

Our program contributes to achieving the following Sustainable Development Goal:
